ALIMENTACIÓN

SIAL 2012, The Global Food Marketplace
20-25 October 2012. Paris Nord Villepinte-France

The world's no. 1 food exhibition will be held in Paris from 21 to 25 October 2012. Make a date in your diary to attend this essential event, which focuses on the major challenges faced by the global food industry.

Good reasons to exhibit are to, improve return on investment, meet 136,381 professionals from the food industry, keep a step ahead on food innovation, take part in the largest live observatory

TECNO FIDTA 2012, 11° Exposición Internacional de Tecnología Alimentaria, Aditivos e Ingredientes
Del 18 al 21 de Septiembre 2012, Centro Costa Salguero de Buenos Aires

ecno Fidta promueve la interacción entre científicos e industriales con el fin de buscar soluciones que satisfagan las exigencias del mercado y optimicen la industria de alimentos.

Durante cuatro días desarrollará un completo programa académico relacionado con la tecnología alimentaria que incluye:

Jornadas técnicas AATA que contarán con la presencia de disertantes de renombre internacional.

Seminarios dictados por organismos y universidades acerca de los tópicos más relevantes de la industria.

Espacio Trazabilidad en Acción que permite conocer las ventajas de contar con sistemas de trazabilidad en diferentes cadenas agroalimentarias.

Conferencias de los expositores

FARMACIA

CPhI Worldwide 2012.
9 -11 October 2012, Feria de Madrid.

Join us in Madrid for CPhI Worldwide 2012, the world's leading pharmaceutical networking event with over 29,500 attendees from over 130 countries and 2,200 exhibitors. Meet face-to-face with international pharmaceutical companies, stay informed about the latest industry trends and remain one step ahead of a constantly changing pharmaceutical market.

INGENIERÍA Y BIOINGENIERÍA

DeSE 2012 – Development in E-Systems Engineering
5 - 7 September 2012 Bucharest, ROMANIA

Sustainability, human health and quality of life have been selected by the ISCRE 22 Organizing Committee as key symposium themes because these topics will continue to determine the scientific, industrial and political agenda for many decades to come.

Energy, raw materials and feedstock resources will become increasingly scarce in the next decades while the demand is increasing tremendously in many world regions. Novel technologies and processes are needed for example for the efficient production of chemicals from biomass feedstock's and for the use of renewable and clean energy sources for electricity production and transportation. The growth and aging of the world population requires new and innovative health systems, such as in the field of controlled drug release, development of smart medical devices, and application of smart diagnostics and analytics. The quality of life is largely dependent on the air and water quality, the degree of emission reduction, development of new personal care and food products, and not to forget on improving process and product safety.

BIOESPAIN 2012. 6th International Meeting on Biotechnology
19 - 21 September 2012. Bilbao Exhibition Center. Bilbao, España

BIOESPAIN 2012 will be held in its 6th edition in Bilbao (19th-21st September 2012) featuring a trade exhibition, a partnering event, an investment forum, the BIOTEC 2012 scientific congress, top level seminars & conferences and a career fair with a well-balanced mixture of local and international private companies, universities, overseas clusters, research institutes and governmental bodies.

Since its first edition, launched back in the year 2003, it has become one of the leading biotechnology events in Europe. In its 5th edition (2010), held in Pamplona (Navarre, Spain), Biospain attracted over 1.300 delegates, 650 companies from 25 countries, featured 168 exhibitors and over 2.100 one-to-one partnering meetings were held, becoming the 7th largest biotech partnering event organized in 2010.

INGENIERÍA INDUSTRIAL

EXPOSOLIDOS 2012, Salón Internacional De La Tecnología Y Procesamiento De Sólidos
Del 13 al 15 de Noviembre 2012, La Farga, l'Hospitalet Barcelona, España

El Salón de la Tecnología y el Procesamiento de Sólidos, es la principal feria del sur de Europa especializada en la manipulación y procesamiento de sólidos, materiales a granel, polvos secos, semi sólidos y separación de sólidos, líquidos.

La presencia de las marcas líderes en EXPOSOLIDOS convierte el Salón en el lugar idóneo para analizar y comparar soluciones a las necesidades tecnológicas de los visitantes.

Un evento muy especializado, de corta duración y con un bajo coste.

EXPOSOLIDOS cuenta con el respaldo de las principales empresas europeas del sector y de los agentes sectoriales

EXPOSOLIDOS es un evento pensado para hacer negocios, networking y buscar soluciones específicas a las necesidades de las empresas que manejan sólidos, semi-sólidos y requieren separa líquido-sólido.

MEDIO AMBIENTE Y ENERGÍAS RENOVABLES

WWEW Water, Wastewater and Environmental Monitoring 2012
7 - 8 November 2012, TELFOR Englandl

November 2012 will be the fifth time this dedicated biennial event will be held. WWEM has evolved into a very successful event since its inception back in June 2005. The event has firmly established itself as the number one event for Water/Wastewater and Environmental Monitoring professionals to attend. In 2010 a dedicated Gas Detection zone of companies who provide fixed and portable gas detectors and calibration gases was introduced those topics will be expanded to include hazardous areas for the 2012 event.

WWEM is supported by the Environment Agency and the leading Trade Associations, therefore visitors can be confident that they will be attending an event of the highest calibre covering topics related directly to their field of work.

WWEM is more than just an exhibition: it is a learning experience. Visitors have the opportunity to participate in, and attend, over 70 walk-in walk-out workshops on case studies, problem solving, new technologies and new applications. They will also gain a wealth of information on modern regulation, MCERTS schemes for water and soil monitoring and are able to network freely around the show.

WWEM is supported by the major product and service providers in the Water, Wastewater and Environmental Monitoring sectors and therefore every stand, every workshop and every conference session will be of interest to every visitor who attends the event.

PACKAGING

PACK EXPO 2012
28-31 October 2012, McCormik Place, Chicago Illinois, USA

PMMI, producer of PACK EXPO International 2012, warmly welcomes you to the United States and to the world's largest packaging and processing show. You'll find more exhibiting suppliers, more innovative technology and more up-to-date educational sessions here than anywhere else. Packaging and Processing Solutions for Every Market- Whatever your industry - from food and beverage to pharma and personal care - you'll discover products and services to streamline operations, reduce costs, speed up production and exceed your customers' expectations at PACK EXPO International.

Meet more than 1,800 processing and packaging suppliers, at one trade show.

Explore more than 1,000,000 square feet of the latest equipment, technology and support for state-of-the-art packaging and processing for every conceivable product. Discover a wealth of integrated solutions, combining processing and packaging for smooth, cost-cutting, time-saving production.

Visit industry-specific pavilions, offering targeted solutions with suppliers grouped together for your convenience.

EMPACK Madrid 2012: EL SALÓN PROFESIONAL DEL ENVASE y EMBALAJE
Del 17 al 18 Octubre 2012. Pabellón 5 de IFEMA.Feria de Madrid

EMPACK Contará con más de 100 expositores que presentarán lo último del envase y embalaje, desde maquinaria, soluciones globales de envase, transformadores, proveedores de materiales, embalaje publicitario y PLV, hasta ecopackaging, contract pack y software.

En su 5º aniversario, contará con numerosas actividades paralelas. Albergará un selecto programa de ponencias, casos prácticos y seminarios gratuitos impartidos por profesionales del sector. Se celebrarán premios como el stand más atractivo y el expositor más activo. El Salón

contará con nuevas zonas como el Área de Demostración, Área Networking y muchas más sorpresas.

EMPACK Madrid 2012 se celebrará con la II edición de LOGISTICS Madrid 2012, la plataforma comercial del almacenaje, manutención y logística, lo que permitirá al visitante profesional encontrar, en un mismo recinto y en escasas horas, soluciones concretas y nuevos proveedores para toda la cadena de valor. Desde el envase primario hasta la distribución, toda la oferta está representada.

PETROQUÍMICA

MERL Oilfield Engineering with Polymers 2012
23-25 October 2012, Millennium Gloucester Hotel, London, United Kingdom

MERL Oilfield Engineering with Polymers 2012 provides an international forum for oilfield operators, contractors and their suppliers to meet and discuss the latest developments in application requirements and materials R&D. This event will build on the 2010 conference, which attracted hundreds of delegates from 23 countries. The technical programme for the 2012 event will reflect the current challenges and solutions for the use of polymeric materials in oilfield engineering. Current themes include: handling of supercritical CO₂, operating in extreme environments (arctic conditions, HPHT, sour fluids etc.), the increasing use of composite materials, development of new materials, rapid gas decompression resistance, qualification testing, long-term reliability and the development of industry standards. Elastomers, thermoplastics and composite materials play a vital role in many critical applications in the oilfield such as coatings, insulation, pipes (bonded and flexible), hoses, seals, flexible joints and bearings, inflatable tools, umbilicals, risers, blow out preventers etc. The industry challenge is to operate safely and reliably in increasingly remote and hostile environments. Key to this is research and development, design, qualification and operational experience.

QUÍMICA

QuimicaCuba 2012. VIII Congreso de Químicas e Ingeniera Química
Del 9 al 12 de Octubre 2012, Hotel Meliá Habana. La Habana Cuba

La Sociedad Cubana de Química (SCQ) se complace en invitarlo al VIII Congreso Internacional de Química, Ingeniería Química y Bioquímica de la SCQ, que se efectuará del 9 al 12 de octubre del 2012 en las instalaciones del Hotel Meliá-Habana, La Habana, Cuba.

Como en ediciones anteriores, esta será una oportunidad especial para divulgar e intercambiar los avances más recientes en todos los campos de la Química.

Las temáticas que se convocan son las Química: Analítica, Orgánica, Inorgánica, Física y Teórica, Industrial e Ingeniería, Productos Naturales, Medicinal y Farmacéutica, Ambiental, Nanociencias y Materiales, Bioquímica y Biología Molecular y la Enseñanza. Estamos seguros que estos temas atraerán la participación de personalidades, grupos e instituciones del planeta.
